Assignment 01 - Responsive Portfolio

Assignment - Problem Statement

Name: _____ Roll No: _____ Date: _____

Problem Description

Design and build a responsive one-page portfolio website for the ExpenseWise project using HTML5 and CSS3 only. The page must present the product like a portfolio: a hero banner, this month's summary figures, the expense categories and a table of recent expenses, and it must remain usable on desktop, tablet and mobile screens.

Requirements

- Use semantic tags: header, main, section, article, table and footer.
- Hero section with the product name, a tagline and a call-to-action button that scrolls to a section.
- Summary section using CSS Grid: 4 columns on desktop, 2 on tablet, 1 on mobile.
- Categories shown as a wrapping Flexbox list of chips.
- Recent expenses table that scrolls horizontally on small screens instead of breaking the layout.
- At least two media queries and CSS variables for the colour theme.
- Capture desktop and mobile screenshots of the final page.

Deliverables

- Source code in src/ (index.html, style.css)
- desktop-view.png and mobile-view.png in screenshots/
